

ENERGY & ENGINEERING SOLUTIONS

CORPORATE OVERVIEW

Jakson Group is a leading energy and engineering solutions company offering a range of products and services that help customers effectively meet their energy needs in a safe and sustainable manner. The company is driven by its core purpose of enhancing the quality of life for all stakeholders by creating a sustainable organization. Our integrated energy and engineering solutions portfolio ensure our customers remain at the forefront, now and into the future.

Jakson market facing businesses include Powergen & Distribution, Solar, EPC and Defence. It also has investments in the Hospitality and Education sector. Established in the year 1947, Jakson has an extensive presence in India with 2200 employees, 3 manufacturing facilities, 22 sales offices, 14 service centres, a global training centre and a wide network of distributors and system integrators. The company has operations in Bangladesh, Nepal, Singapore, Dubai and several countries in Africa. Its corporate office is located in Noida, Uttar Pradesh, India.

BUSINESSES

Powergen & Distribution

Jakson Powergen & Distribution Business comprises manufacture and sale of Cummins powered diesel gensets, construction & maintenance of captive diesel power plants and training of engineers through a one-of-its-kind training facility in India. We provide integrated solutions, right from individual generator sets to design and execution of diesel power plants, all backed by an unparalleled service support. We have the expertise to successfully meet the power requirements of a wide range of individual and institutional customers and have years of demonstrable experience in successfully executing several mid to large scale power projects for customers across industries.

Solar

Jakson has an integrated solar portfolio that includes solar component manufacturing - PV Modules & MMS, solar products & applications, solar projects and solar IPP. We have the expertise to serve the entire value chain of a solar plant with our in-house manufacturing of PV modules and module mounting structures; turnkey EPC for both land based and rooftop solar projects. We also offer Operations & Maintenance services for solar power plants. As a Solar IPP, we own and operate solar power plants that sell power to state utilities under long term PPAs.

EPC

Jakson provides turnkey engineering, procurement and construction (EPC) services for urban and rural electrification projects, electrical substations, transmission & distribution networks, metro rail, building electrification and civil construction amongst others. We have the requisite engineering skills and experience to deliver complex projects on time and budgets. Our team of highly skilled engineering professionals have delivered several prestigious and highly challenging EPC projects for government bodies, public sector undertakings (PSUs) and corporates. The company has a strong portfolio of past and existing projects across multiple industries that include power and energy, airports, highways, railways and urban transport.

Defence

Jakson has expertise in designing and developing specialized products and applications for the defence sector that meet the stringent quality requirements of the armed forces. Our customized solutions are currently being used by various wings of the Indian defence sector for their operational purposes. Our range of products for the defence forces include ground power units, auxiliary power units, power packs, containerized accommodations and other re-powering solutions. We have also used our engineering expertise to offer reliable and clean solar products and solutions to the defence forces for off-grid sites.

Hospitality

With an aim to build a chain of world class hotels in India, Jakson Group entered the hospitality business in the year 2012 with the launch of a Platinum Leed Certified Hotel - Jakson Inns in Phaltan, Maharashtra. The business hotel offers 69 guest rooms, 4 guest suites, including rooms for single lady travelers. Jakson also operates a boutique nature resort near Jim Corbett National Park in Uttarakhand.

Education

Jakson Group forayed into the education sector with an aim to provide world class quality education in India. The company has invested in setting up a girl's residential school in Neemrana, Rajasthan and a K12 co-educational day school in Gurugram, Haryana.

MANUFACTURING

Jakson has three state-of-the-art manufacturing facilities spread across three states in India. These facilities are used for manufacturing gensets, solar modules, module mounting structures and various solar products. Each of these manufacturing plants are equipped with the most advanced machinery and technology tools to build world class products with highest quality standards.
