

# Indian expertise

The 50 megawatt Blitta solar power plant (270 km from Lomé) was inaugurated on June 22.

It is named after the Crown Prince and Minister of Defense of Abu Dhabi, Sheikh Mohammed Bin Zayed.

No wonder since the project was funded by AMEA Power, a company based in the Emirates.

**Jakson Group will** (<https://www.jakson.com/>) take care of the operation and maintenance of this plant for 2 years.

Founded in 1947, this Indian company has 3 solar energy equipment factories and manages six independent solar power plants. It is one of the top ten energy players in India.

"We are proud to partner with AMEA Power, to execute the construction of the Sheikh Mohamed Bin Zayed solar power plant in Togo," said Sameer Gupta, President of Jakson Group.

Work is continuing at Blitta to achieve a power of 70 MW.
