

Jakson enters green hydrogen space:

Jakson Group has forayed into green hydrogen and ammonia space with the launch of a new venture called Jakson Green Pvt Limited (JGPL). The new entity will also be active in waste-to-energy, electrolyzers and fuel cells, utility scale battery energy storage systems (BESS), solar and related operation and maintenance services across these lines of business. JGPL has already entered an agreement with a US based fuel cell maker, not identified, to pursue hydrogen projects in India. To lead the venture, Jakson Group has hired Bikesh Ogra as the CEO and MD who comes to the group from renowned solar EPC Sterling & Wilson Solar Ltd (SWSL) where he served as the global CEO. JGPL will have Kannan Krishnan as its COO.
