

# Blitta solar power plant commissioned by JAKSON GROUP

President Faure Essozimna Gnassingbé inaugurated on June 22 a [50 MWp solar power plant in the city of Blitta](#) in Togo. Sheikh Mohamed Bin Zayed Solar Power Plant Project is developed by AMEA Power (UAE) and designed, installed, commissioned and executed by JAKSON GROUP.

The plant would supply nearly 600,000 households as well as 700 small and medium-sized enterprises (SMEs) in Togo. The plant is expected to supply 90,255 GWh of electricity to the grid each year. The first stone of the solar power plant was laid by President Gnassingbé in February 2020.

On the successful execution of the project, Mr. Sameer GUPTA, President and CEO, JAKSON GROUP said: “We are proud to partner with AMEA Power, to execute the construction of the Sheikh Mohamed Bin Zayed solar power plant in Togo, the first utility scale [solar power plant](#) in West Africa. With its proven track record of executing large scale solar EPC projects, JAKSON is an ideal partner for solar developers to implement large scale solar energy projects in Africa. ”

JAKSON GROUP will take care of the operation and maintenance of the Blitta solar power plant for two (2) years.

## About JAKSON GROUP

Founded in 1947, JAKSON GROUP has branched out from a diesel generator manufacturing organization to an energy solutions company providing expertise in the areas of distributed power, solar power, solar EPC and IPP solutions and electric.

The company has an extensive presence throughout India with three (3) manufacturing plants, six (6) independent solar power plants, one (1) global training center, over thirty (30) sales offices and a large network distribution partners and resellers, making it one of the top ten (10) energy companies in India.

With a focus on selling top quality products and customized solutions, the company offers the most viable and cost effective solutions to its customers, backed by long-standing expertise in the energy industry. .
