

JAKSON Group, with FY26 Revenue of Over INR 9,000 Crore, Unveils Five New Energy Solutions

New Delhi, April 13, 2026: JAKSON Group, one of India's leading energy and infrastructure conglomerates, today announced a major expansion of its energy solutions portfolio with five products: **JAKSON Genset Xtra, BESS, Solar Kit, Mobile Light Tower (MLT), and Electric Three-Wheelers.**

This portfolio expansion marks a significant step in JAKSON's journey to build a more comprehensive and future-ready energy ecosystem. Backed by a legacy of over 78 years defined by quality, trust and engineering excellence, the Group is strengthening its presence across power generation, energy storage, solar adoption and cleaner conventional energy solutions. Through this expanded portfolio, JAKSON is reinforcing its commitment to delivering technologies that combine performance, reliability and environmental responsibility.

Mr. Sameer Gupta, Chairman, JAKSON, said, *“At JAKSON, our mission has always been to power progress through innovation. With FY26 revenue of over INR 9,000 crore, JAKSON today has both the scale and the responsibility to shape future-ready energy solutions. This portfolio expansion reflects our commitment to building an integrated energy ecosystem that is reliable, responsible and aligned with the evolving needs of customers in India and global markets.”*

Mr. Sundeep Gupta, Vice Chairman, JAKSON, said, *“The market today is looking for energy solutions that are efficient, dependable and future-ready. With this expanded portfolio, JAKSON is strengthening its position as a diversified player serving evolving customer needs across sectors.”*

Mr. Sudhanshu Pokhriyal, CEO, JAKSON Distributed Energy Business, said, *“This marks an important milestone for us. We are expanding our portfolio with solutions that combine reliability and sustainability while helping customers address their energy needs with greater confidence and flexibility.”*

JAKSON Genset Xtra has been designed as a compact and dependable power solution for small commercial establishments and residential applications. Built for everyday energy needs, it offers fuel efficiency and silent operation, making it well suited for bungalows, shops and ATM booths where reliable backup power remains essential.

JAKSON BESS is an advanced energy storage system developed to offer dependable backup power and greater energy independence for homes and commercial spaces. Available in four variants, 3 kVA for outage support, 5 kVA for daily home needs, 10 kVA for larger households, and 15 kVA for complete power freedom, the solution is compact, safe, zero maintenance and designed to support cleaner living.

JAKSON Solar Kit is a complete rooftop solar solution developed in compliance with MNRE and IS standards. Conceived as a system-in-a-box, it includes high-efficiency Solar PV Modules, Solar PV Inverter, DCDB, ACDB with LED indications, MC4 connectors, Lightning Arrestor and Earthing Kit, offering customers a comprehensive and safety-led rooftop solar package.

JAKSON Mobile Light Tower (MLT) has been engineered to deliver dependable performance in demanding environments while lowering environmental impact. Designed for quick transportation and easy relocation, it offers durability in harsh weather conditions, a runtime of 40 to 50 hours, and a lifespan of 50,000 hours. The product is ideal for applications across defence, infrastructure projects, construction sites, disaster relief operations and outdoor events.

Additionally, the Group has marked its entry into the electric mobility segment through a strategic partnership with a Bengaluru-based company. This move brings advanced, R&D-backed **electric three-wheelers** into JAKSON's portfolio and further strengthens the Group's position as a comprehensive force across clean energy generation, storage and sustainable mobility.

With this expanded portfolio, JAKSON is reinforcing its role in shaping the next phase of the energy transition. As markets move towards cleaner, smarter and more resilient energy systems, the Group remains focused on delivering solutions that are relevant to market needs, grounded in innovation and built for long-term impact.

About JAKSON Group:

Established in 1947, JAKSON Group has evolved from specializing in diesel generator manufacturing to becoming a multifaceted energy and infra solutions provider. The company operates across distributed energy, solar power, renewable energy, green molecules, alternative fuels, and energy storage systems, along with renewable, metro, electrical, water and civil EPC services. With six manufacturing facilities, over 30 sales offices, and 12 international offices, JAKSON has built a strong footprint across India and global markets. Supported by a wide network of channel partners and dealers, the company ranks among India's top energy players. With a workforce of approximately 3,500 employees, JAKSON serves over 1,00,00 customers, delivering high-quality, value-driven solutions backed by deep industry expertise.
